(54) **METHOD FOR PROVIDING INFORMATION**

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a system for supplying information, on the basis of the positional information of a mobile telephone.

SOLUTION: A base station 2 to which a mobile telephone 1 (hereafter A) is connected registers the position of the telephone 1 into a service center 5 (hereafter B). The B acquires the position of the A by a normal speech communication by the A (1), an explicit positional registration instruction by the A (2) and a periodical A positional information acquisition request by the B (3) and immediately or periodically offers information which is based on the positional information to the A or to another computer or as a printed matter.
